SUMMARY

Java Backend Developer with 2+ years of experience maintaining and enhancing production ERP systems using **Java, Spring Boot, REST APIs, and SQL Server**. Skilled in legacy code maintenance, performance optimization, and delivering long-term enterprise solutions for 100+ users. Strong in **OOP, DBMS, and Spring Security**. **Open to Relocation and Immediate Joiner**.

SKILLS

Languages: Core Java(8/11/17), SQL, JavaScript

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate/JPA, Spring Scheduler

Databases: MySQL, PostgreSQL, MS SQL Server, MongoDB

Tools & Platforms: Git, Maven, Docker, Kubernetes, Kafka, Postman, JUnit, Mockito, CI/CD pipelines, kubernetes

Concepts: REST APIs, JWT Authentication, RBAC, OOP, DBMS, Event-Driven Architecture, Microservices

EXPERIENCE

Dataman Computer Systems Pvt. Ltd.

Nov 2023 – Present

Associate Software Developer

Delhi, India

- Built and maintained **Web modules** (inventory, production, order management) using **Java, Spring Boot, and MS SQL Server**, serving 100+ enterprise users across multiple business units.
- Designed and exposed **20+ RESTful APIs** with Spring Boot following layered architecture, enabling seamless integration between frontend and backend ERP components.
- Implemented **Spring Security with JWT authentication and RBAC**, replacing legacy session-based auth and reducing unauthorized access incidents to zero.
- Optimized **critical SQL queries and Hibernate mappings**, cutting average API response time by **30%** and reducing database load during peak ERP operations.
- Collaborated on legacy code refactoring initiatives, improving code maintainability and reducing bug resolution time across the backend codebase.

PROJECTS

AI-Powered Expense Tracker | *Java, Spring Boot, MySQL, Kafka, WebSocket, Spring Scheduler*

[GitHub](#)

- Built a full-stack expense tracking system with **JWT-based authentication**, budget alerts, and real-time monitoring via **WebSocket**.
- Designed **Kafka event-driven pipeline** for live expense updates, push notifications, and automated monthly report generation.
- Integrated **OCR-based receipt parsing** from payment screenshots with duplicate transaction detection to prevent double entries.
- Automated recurring expense tracking (EMI/SIP) using **Spring Scheduler**, reducing manual entry overhead entirely.
- Delivered **AI-powered spending insights**, Excel exports, email/SMS alerts, and interactive chart dashboards.

Business Management System | *Java, Spring Boot, MySQL, Hibernate/JPA, REST APIs*

[GitHub](#)

- Developed a backend system managing **inventory, billing, and user operations** via RESTful APIs built on layered architecture (Controller → Service → Repository).
- Implemented full **CRUD operations** with input validation, error handling, and **Hibernate/JPA** ORM for clean database interaction.
- Optimized SQL queries and entity mappings, reducing average query execution time and improving API response consistency.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Dec 2023 – Jun 2026

B.Tech in Computer Science & AI

Kanpur, Uttar Pradesh

- Relevant Coursework:** OOP, Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Artificial Intelligence, Machine Learning.

Government Girls Polytechnic

Sep 2020 – Jun 2023

Diploma in Information Technology | **CGPA: 7.58/10**

Varanasi, Uttar Pradesh

- Relevant Coursework:** Programming Fundamentals, Web Development, Database Systems, Computer Networks.

ACHIEVEMENTS

- Solved **150+ problems** on LeetCode, focusing on Data Structures and Algorithms. [Profile](#)
- Completed **Java Spring Framework, Spring Boot & Spring AI (Gen AI)** course on Udemy — covering advanced backend development and AI integration.
- Completed **Java Training Complete Course** on Udemy, strengthening core Java and backend fundamentals. [Certificate](#)
